Every permanent makeup service, mapped

Each service is demonstrated live, then practised on models until consistent.

Skin, pigment and mapping — the science behind every set.

01 · Skin anatomy & preparation

Skin layers, healing cycles, contraindications and pre-procedure preparation for safe work.

02 · Colour theory & pigment selection

Undertones, pigment behaviour, colour correction and choosing shades that age well.

03 · Brow mapping & facial measurement

Golden-ratio mapping, symmetry checks and custom brow design for every face shape.

04 · Machine & blade control

Digital machine handling, needle depth, speed and hand pressure for consistent pigment placement.

COMPLIMENTARY · ONLINE + IN-STUDIO

30-DAY ADVANCED · FULL ARTISTRY

Advanced techniques for premium, corrective and combination work.

Scalp micropigmentation

Density illusion, hairline design and follicle simulation for thinning hair.

Combination & ombre brows

Blend microblading with machine shading for textured, dimensional brows.

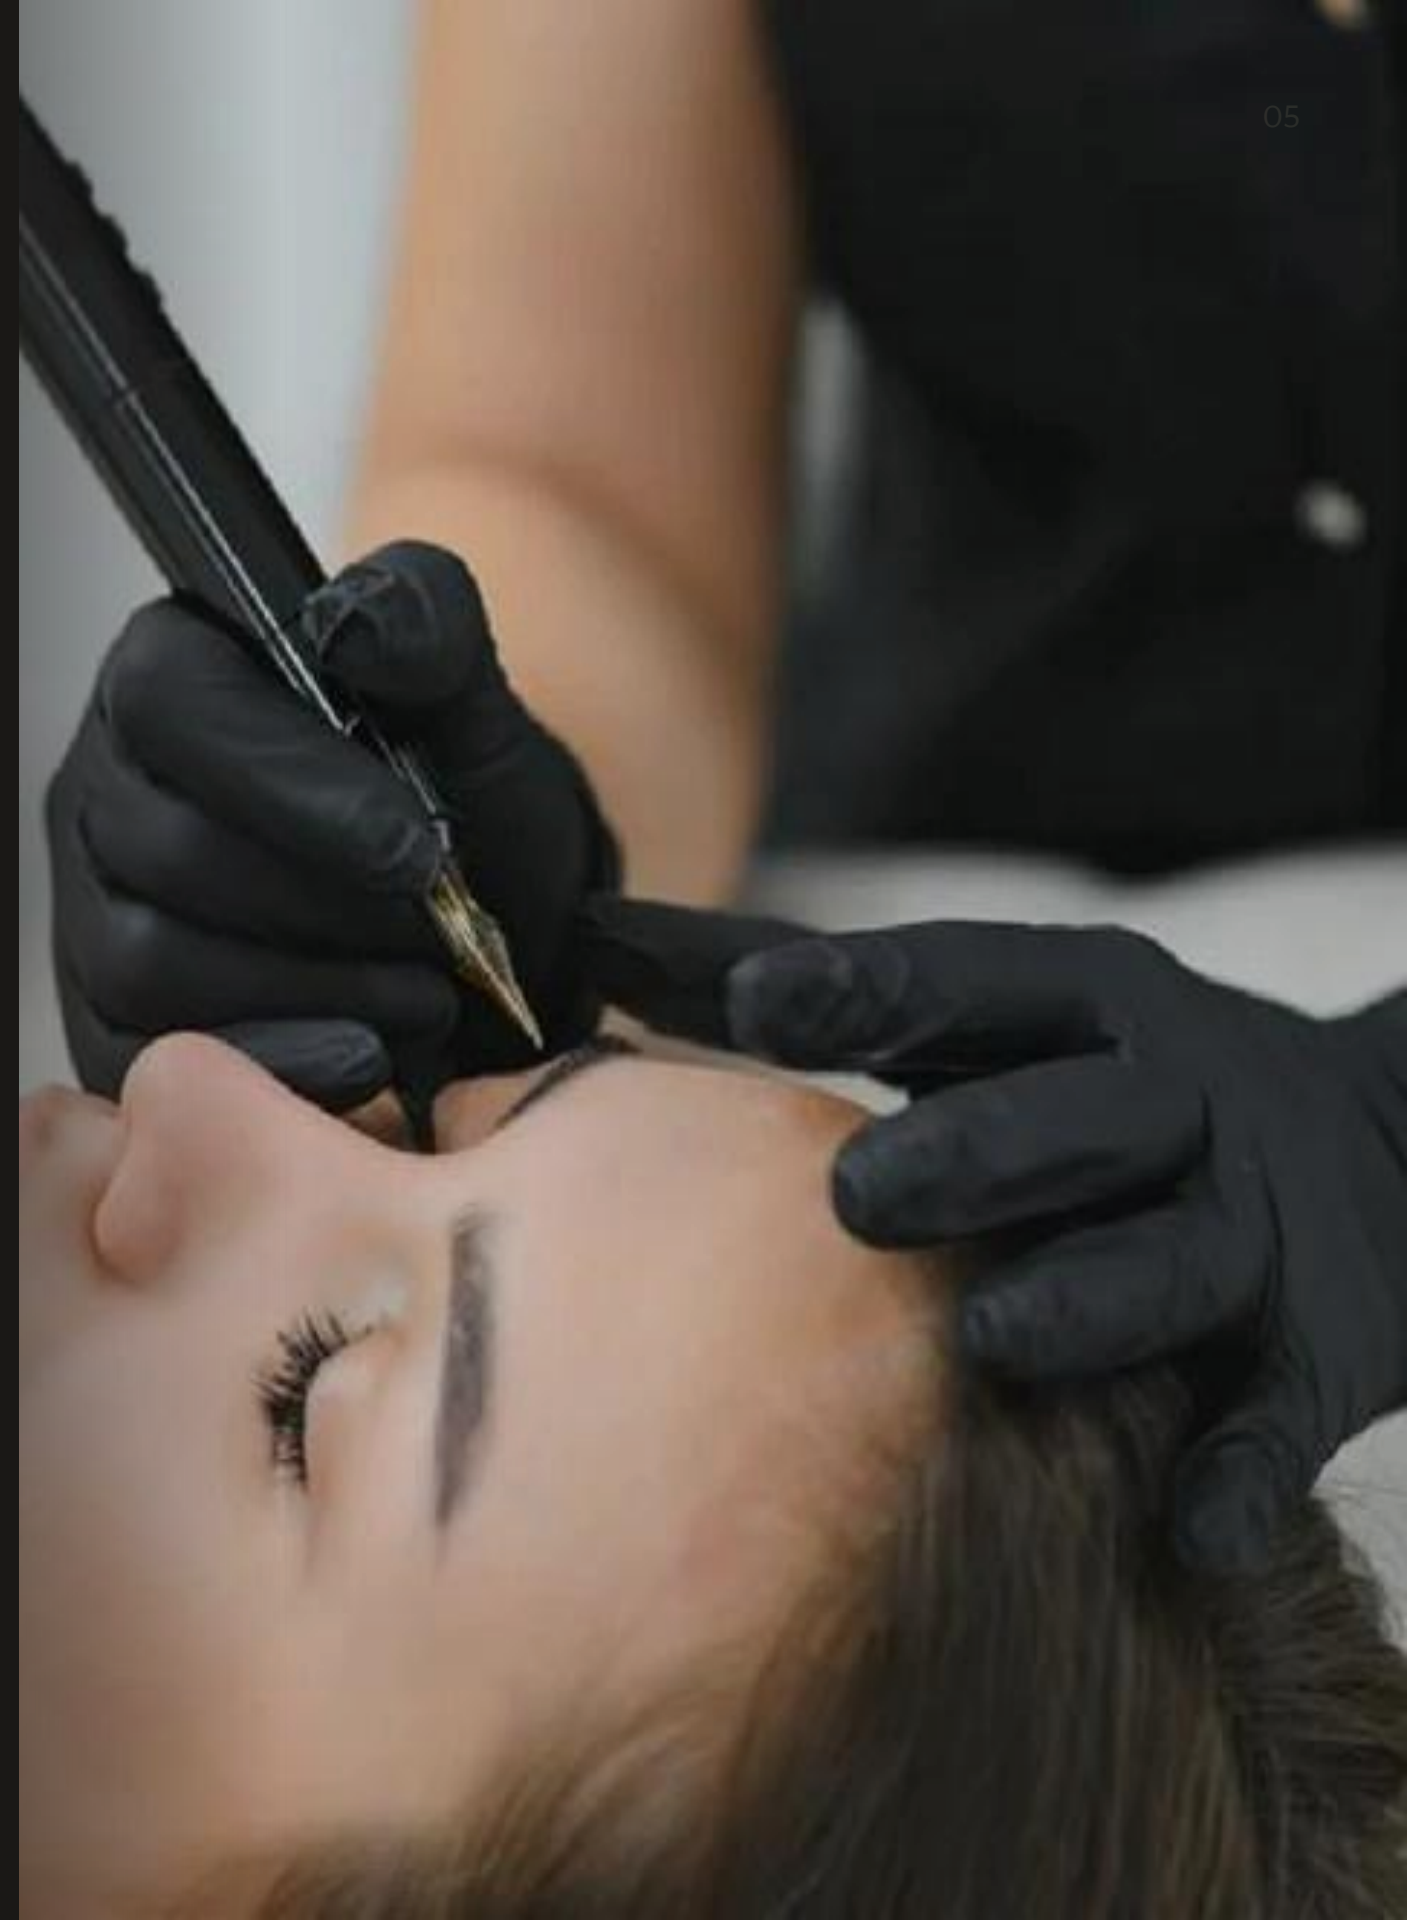

Lip neutralisation

Correct dark or uneven lip tone before blush for natural, even results.

Correction & removal basics

Colour correction, saline lightening and safe fading of old pigment.

Includes everything from the 14-day course, plus business setup, pricing strategy and portfolio development for your own studio.

PRACTICE SETUP

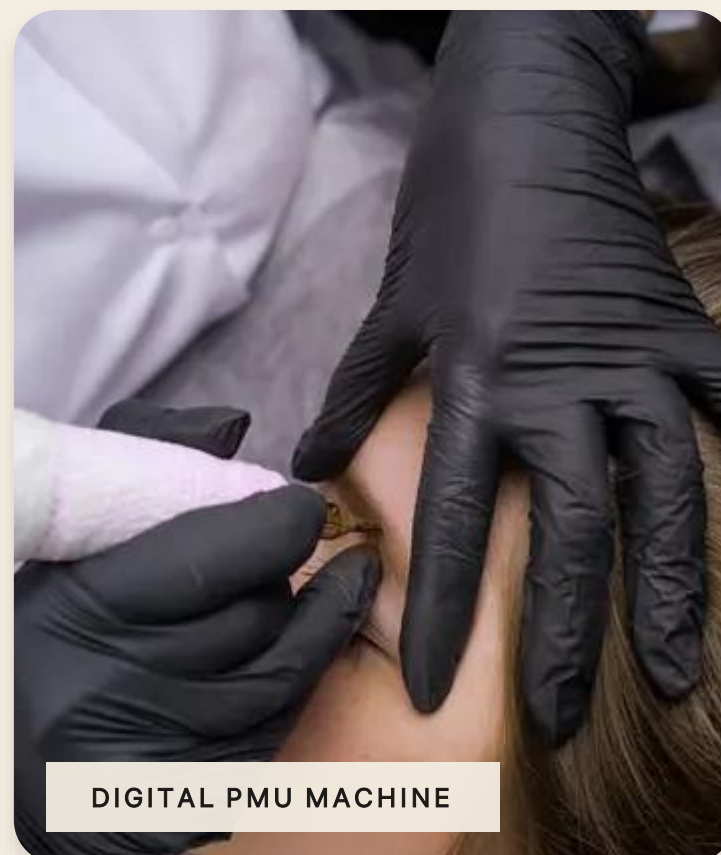

The PMU kit students master, tool by tool.

Every station uses the same professional kit students practise on — each tool is taught with its purpose, settings and safe handling.

SAFETY FIRST

Patch tests, cross-contamination control, needle disposal and client consent are drilled before any live-model work begins.

All tools, pigments and practice materials are provided during class.
